

SCIENCE MUSEUM GROUP

**Find out more about a
major upcoming project
in your area.**

The Science Museum Group is investing in new facilities at its site in Wroughton, near Swindon, to better care for and manage its world-leading collection.

This is a once-in-a-generation opportunity for the Group to transform how it looks after and shares its collection of inspirational objects, and the extraordinary stories they tell.

You are invited to attend a public drop-in session, at which you can find out more about the project, see the plans and talk to the team.

SESSION 1

Monday 27 November
14.00 – 19.00

Ellendune Community Centre,
Barrett Way, Wroughton,
SN4 9LW

SESSION 2

Wednesday 29 November
14.00 – 19.00

The Wyvern Theatre,
Theatre Square, Swindon,
SN1 1QN

Email planning.feedback@sciencemuseum.ac.uk for more information
or visit www.group.sciencemuseum.org.uk/developingwroughton

A new collections management facility will be built at the Science Museum Group site in Wroughton (SN4 9LT), which will house more than 340,000 objects in the Group's Collection.

The new facility will enable greater access to the collection through a varied programme of guided tours, learning experiences and research. It will provide improved collections management and speed up the process of preparing objects for loan to other organisations, or for display in new galleries and exhibitions across our family of museums.

THE SITE

The building will be located in the northern section of SMG Wroughton. Access to the site will be through the existing entrance at Red Barn Gate from the A4361.

THE BUILDING

The new facility will take the form of a modern warehouse building, appropriately designed for the site and its use. It will run perpendicular to one of the former runways and will provide 26,000m² of new storage, conservation and public access facilities within a single structure.
